

Tasks

Development

In Progress ▾

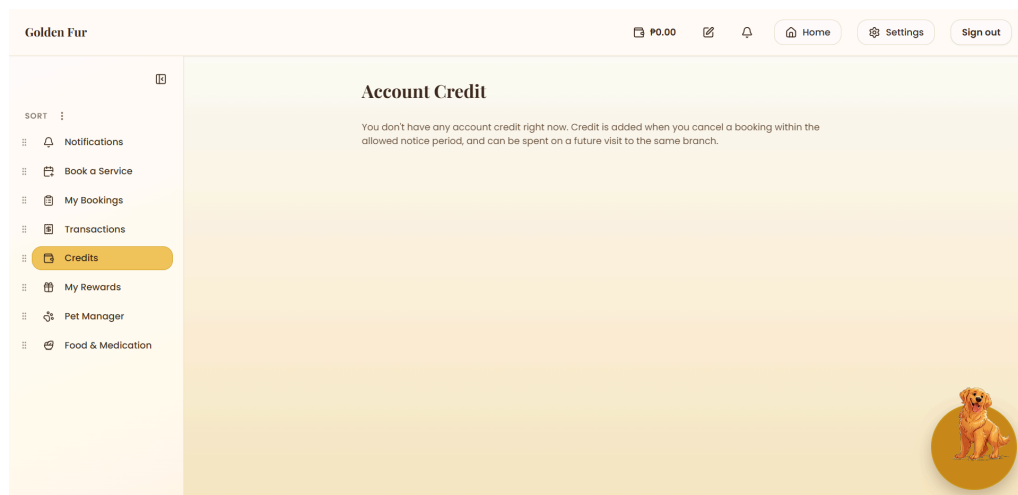

- As an admin/superadmin, I want the config section in Settings page to list down all the contents of each subsection under config in a straight down manner
 - I want the shared search, sort, filter options to be implemented at the top of the config page, where it will filter out the contents in each subsection and show it in the config page

James ▾

In Progress ▾

- As a developer, I want customers to be able to see my credits breakdown in the credits page even if I have 0 credits, currently it's hidden

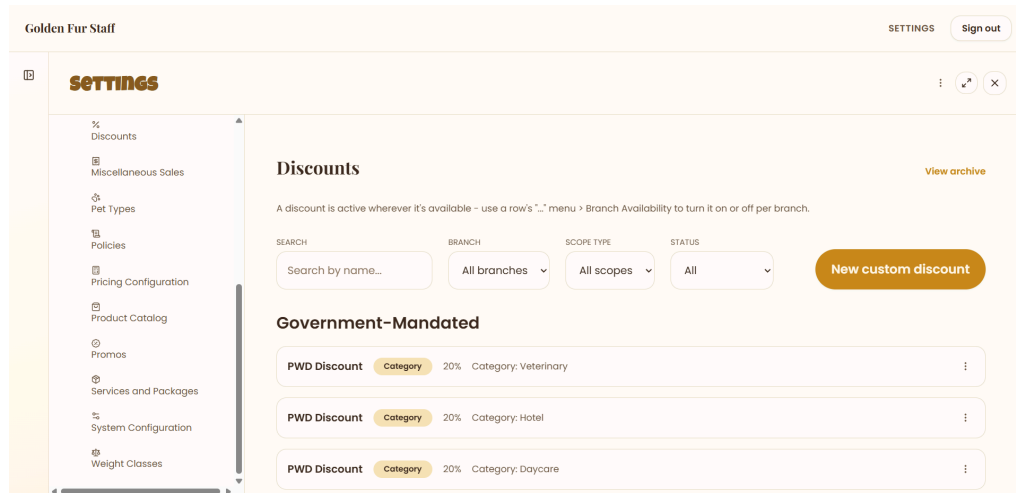

James ▾

In Progress ▾

- As a developer, I want to remove the View Archive button from Settings > Config > Discounts
- Create a section instead in Config > Archive
- Should include all archived rows from all tables
- Add search, sort, filter, group by, view options (table, list, kanban), ... button that appears on hover

James ▾

Merged ▾

- As a developer, I want the Font size slider to reach the very end of the slider when set to max
- Currently, the limit is just barely the end of it

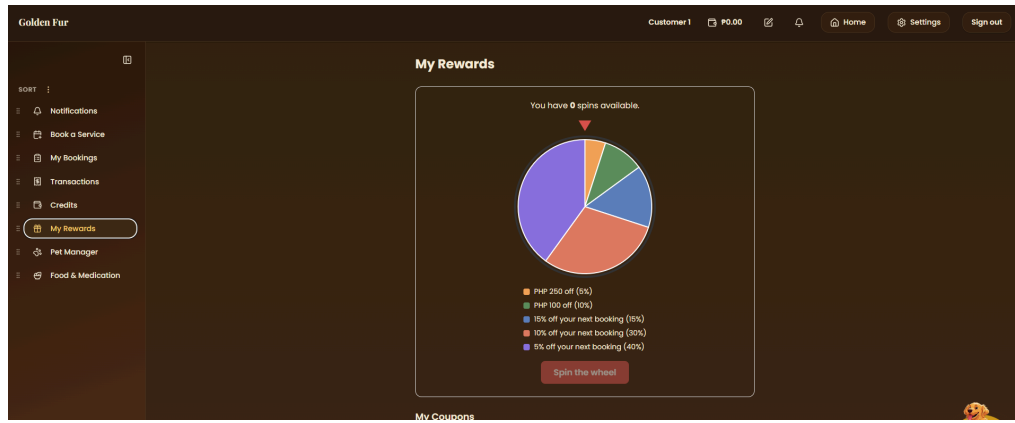

James ▾

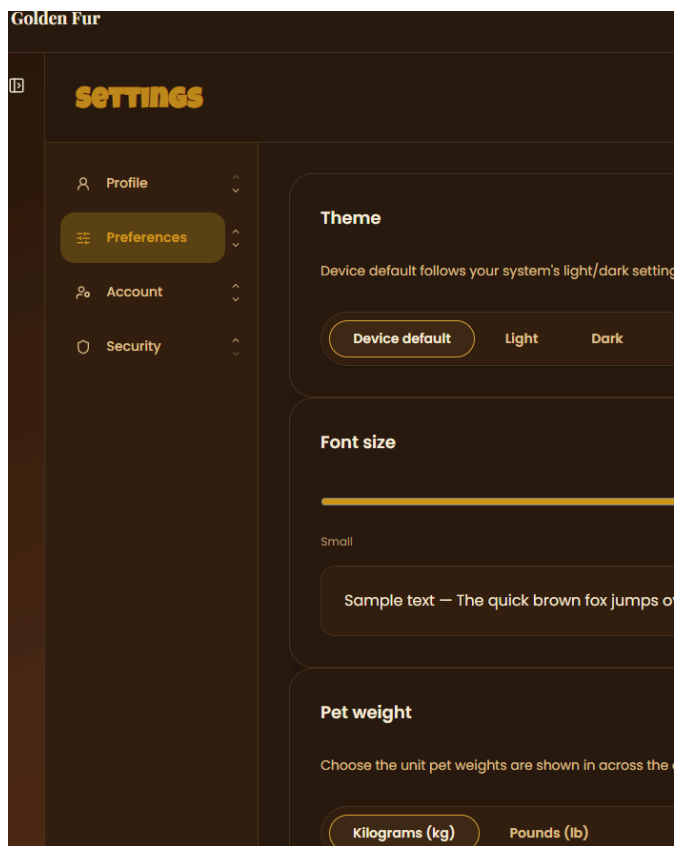

Merged ▾

James ▾

- As a frontend designer, I want the white border removed from the wheel, and I want the wheel contents to match the current color theme (light or dark)

- As a developer, I want a Danger section in the Settings page sidebar
 - It should include things like reset settings to default, deactivate account, delete account
 - Deactivating an account should log out the user
 - When trying to log in, it will redirect the user to a notice page saying something like: “This account has been deactivated and will be automatically deleted after X days. REACTIVATE, LOG IN TO OTHER ACCOUNT buttons)”
 - Automatic Deletion days threshold should be configurable by admin users in Settings page

Reviewing ▾

- As a developer, I users to be able to change my email, unbind my Google account (if used google signup) in Settings page > Account section
- I want there to be sections that divide these different actions

James ▾

Reviewing ▾	● While I'm booking as a customer, I want to be able to see a summarized view of APPLICABLE promos ○ I want to have a search, filter, sort and group by features in case I accumulated a lot of promos ○ I want them to be default grouped by their type (e.g. the time limit, promo on X day, spin the wheel reward, etc.) 	James ▾
Not Started ▾	● Add clear discount messaging on package cards/detail views (e.g., 'Save 10% vs. booking individually') so the savings versus individual pricing are obvious to the customer.	James ▾
Not Started ▾	● Disable date options earlier than the booking's current effective date in the reschedule date picker. ○ As a customer, I want to see the available date and times when I'm creating a new booking perhaps in a calendar format ○ I want there to be a by week and by month view	James ▾

Not Started ▾	● As a supervisor/admin, I want an auto configure monthly schedule feature ○ Automatically chooses rest days, etc. for all staff ○ Available in the monthly schedule UI ○ Should affect staff availability (when choosing staff in booking queue > staff picker step ○ I want it to be in a form of a Auto Build button > opens up popup modal with confirmation message > loading spinner > preview modal, can make adjustments, exiting removes progress, confirmation button at bottom ○ Also include a clear monthly schedule button > shows a warning confirmation message	Alarie ▾
--------------------------	---	---------------------

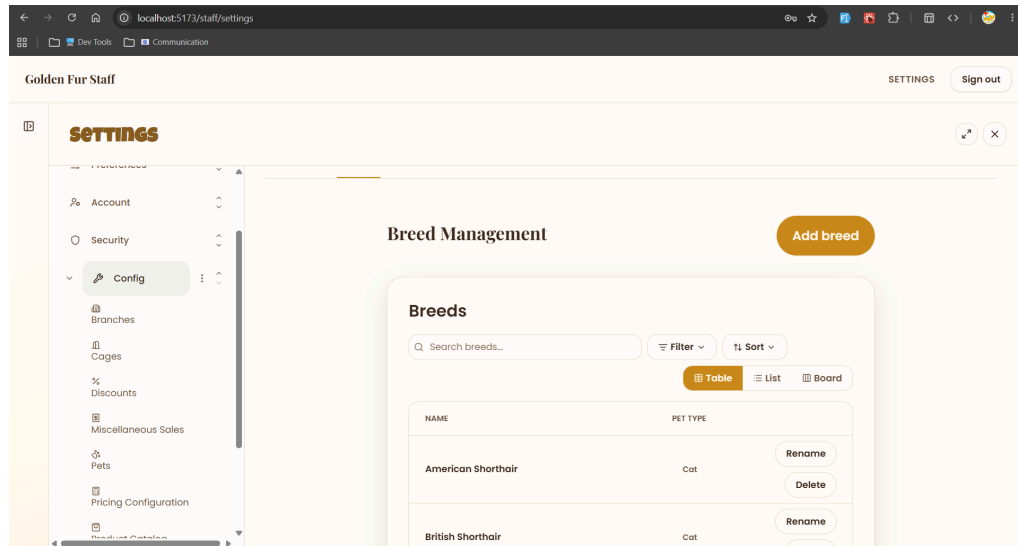

- As a developer, I want the **Forbidden** error hidden when making a new booking for a patient as a vet staff

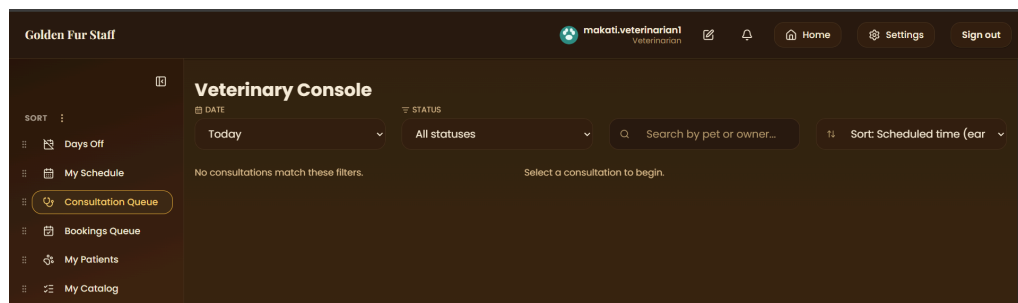

Errors:

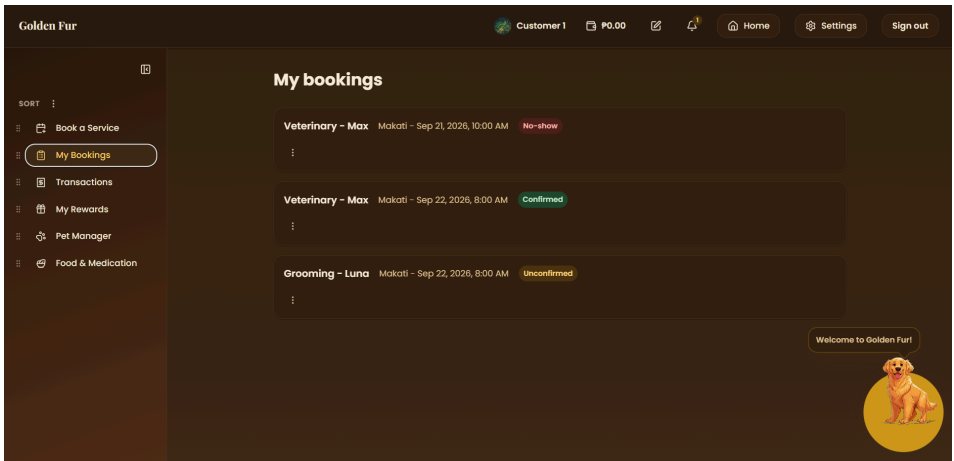

- As a developer, I want to have a ... button for each row in admin settings > config > pets > breeds

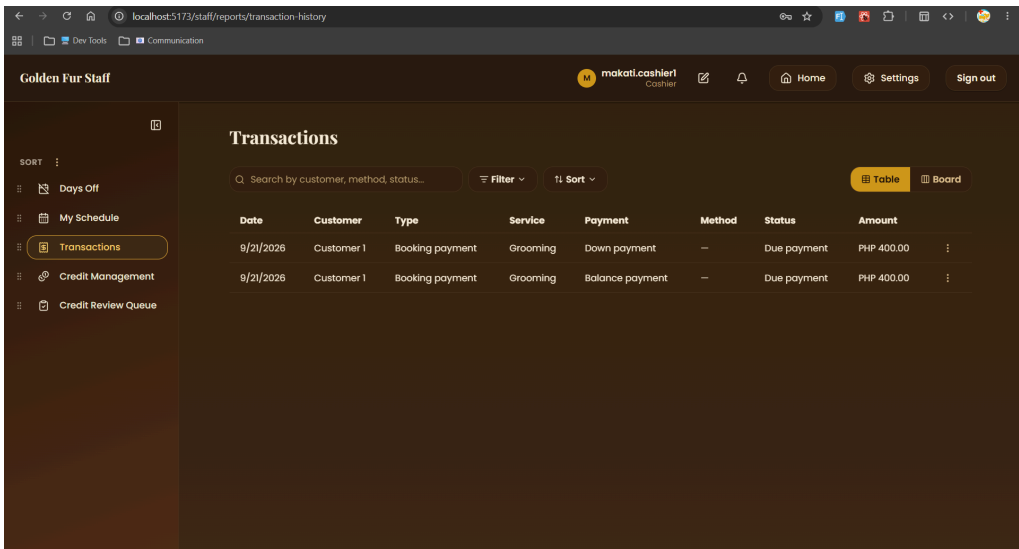

- As a vet staff, I don't want access to the bookings queue, I want it to be integrated into my consultation queue
 - Where I can schedule a new consultation for my patients
 - Clicking on New Consultation builder opens up a filtered booking builder (e.g. filter my customers, no service step auto vet service type, etc.)

- As a developer, I want customer made vet service online bookings to not be auto confirmed, it should still be unconfirmed like all other service types

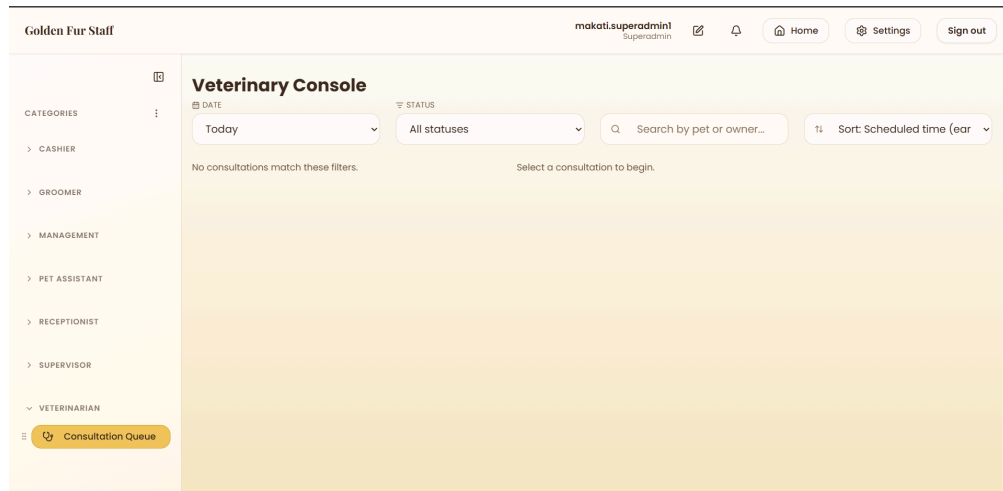

- As a cashier, I still want to be able to view the transactions of confirmed bookings (even from the auto confirmed vet service booking) at my transactions page

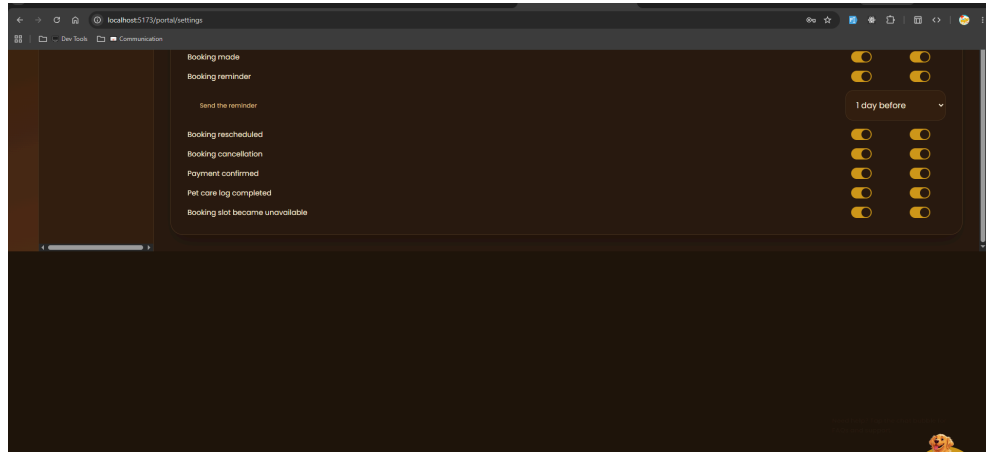

- As a developer, I want to change how tap on mobile opens up the board/gallery view > ... options, into hold (from tap → hold)

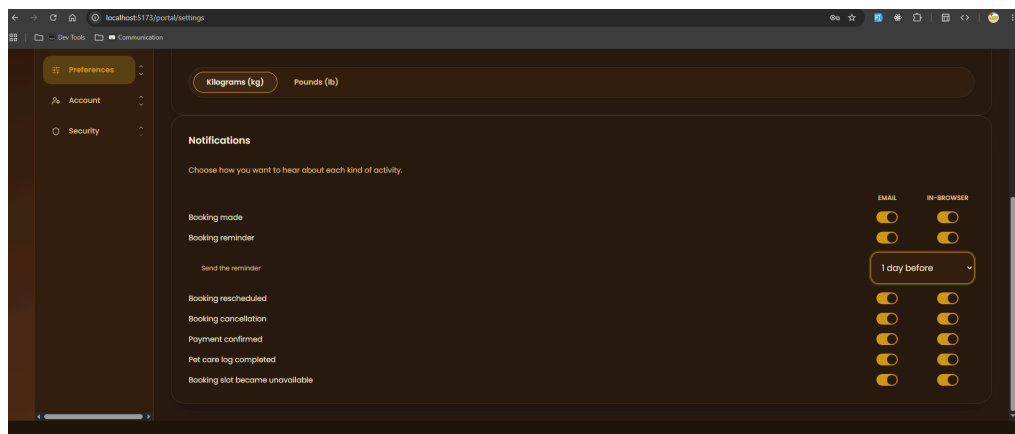

- As a frontend designer, I want the shared search, sort, filter, group by and view options to be applied in the consultation queue page

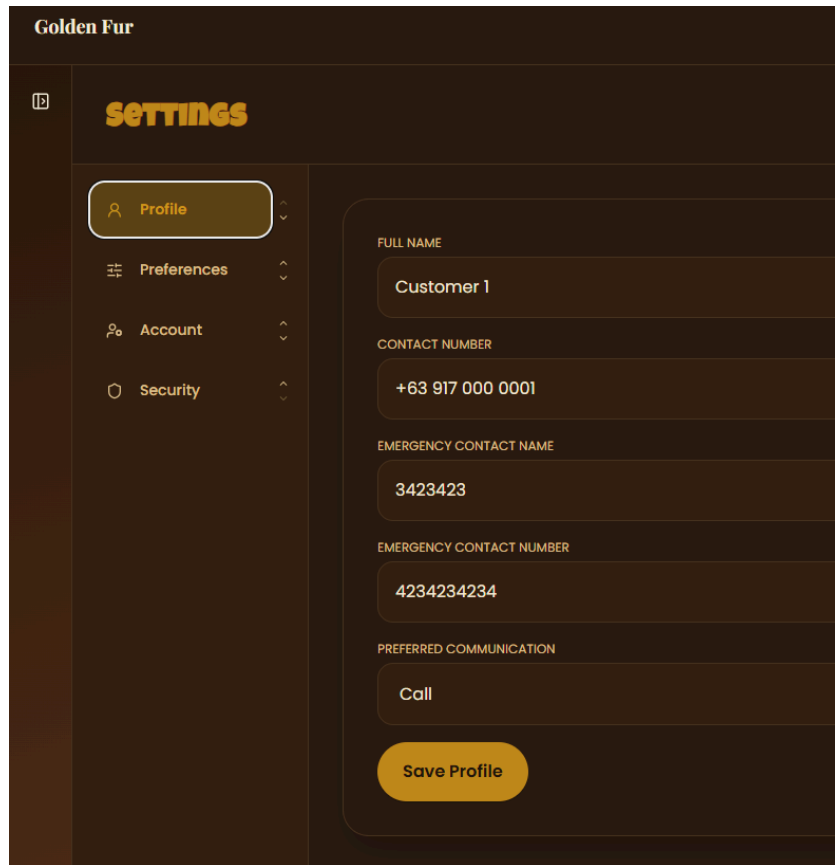

- As a frontend designer, I want this huge dark box removed when scrolling at the very bottom of the Settings page

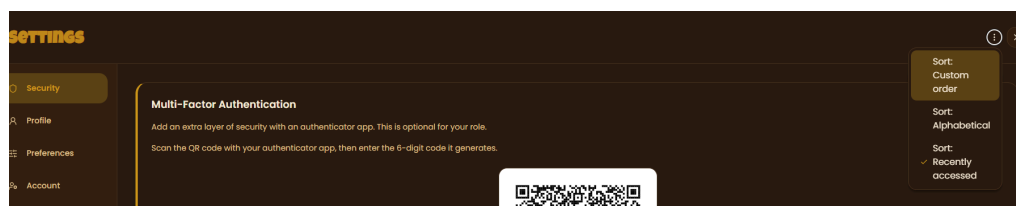

- As a developer, I want a Save or Discard tile that appears at the bottom of the screen when editing things in Settings page (like Discord UI UX design/interface)
 - When trying to leave the page, I want a toast to notify me that I still have some unsaved changes and prevent me from leaving

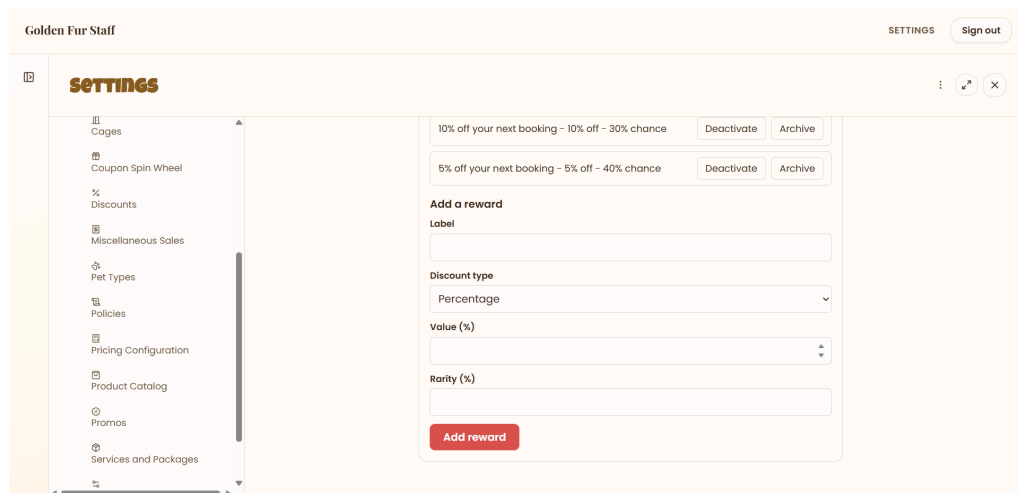

- As a user, I want to be able to upload a new profile image, or select one from an existing set when in Settings > Profile
- I want it to reflect on my user icon at the navbar

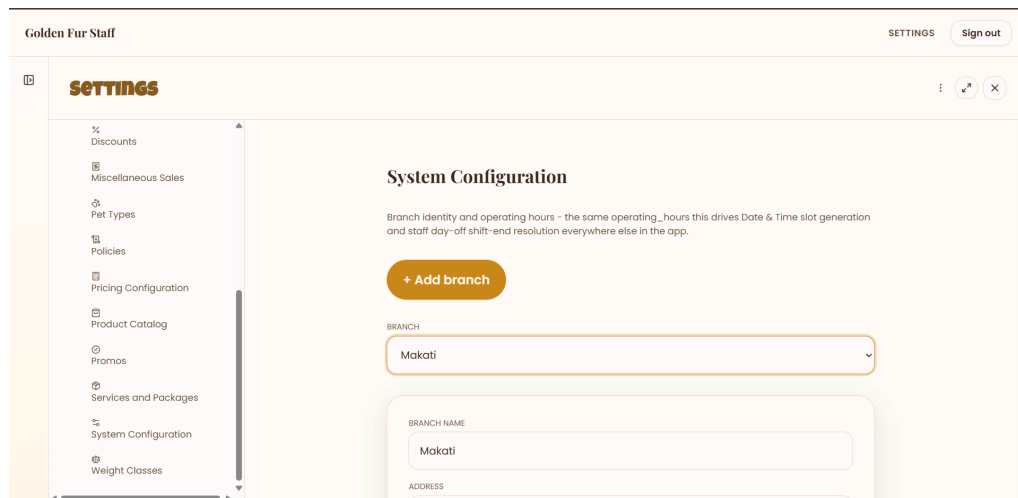

- As a frontend designer, I want the ... button in Settings to be moved right next to the navbar items
 - I want it to only appear on hover

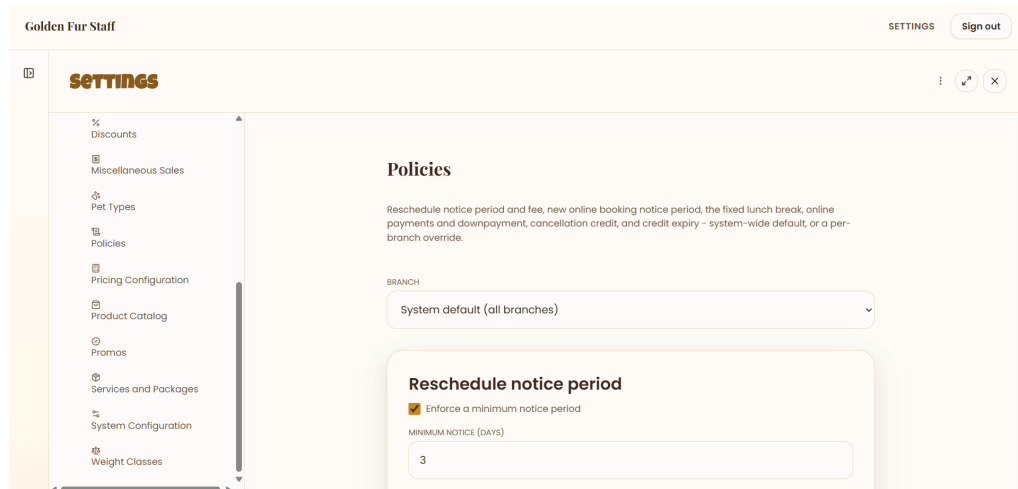

- As an admin/superadmin, I want the Coupon Spin Wheel section in Settings to be moved inside the Promos section, as a subsection
- Make the Add a Reward form to only appear as modal when button is clicked
- Rename the Reward Label property → Title

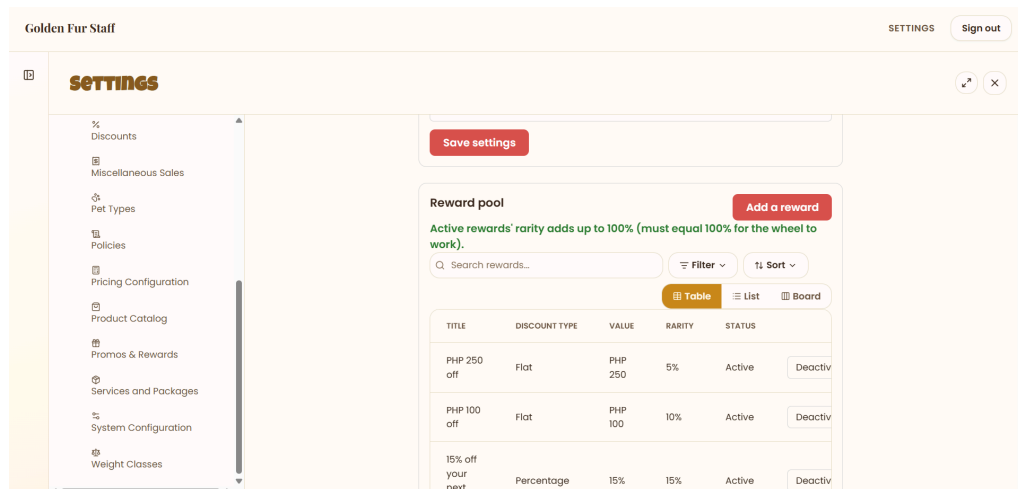

- As a developer, I want to implement search, sort, filter, group by and view options (table, list, gallery, board) in settings > config > system configuration
- Each item should have a ... button with configure, deactivate and archive as actions

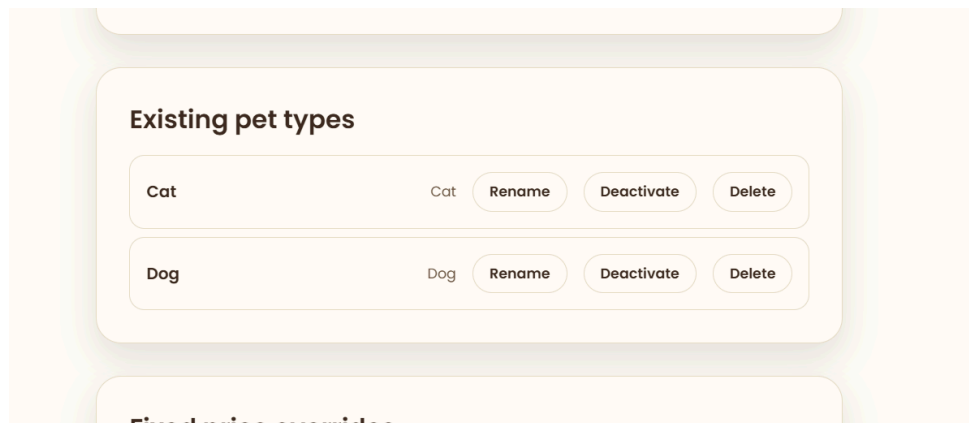

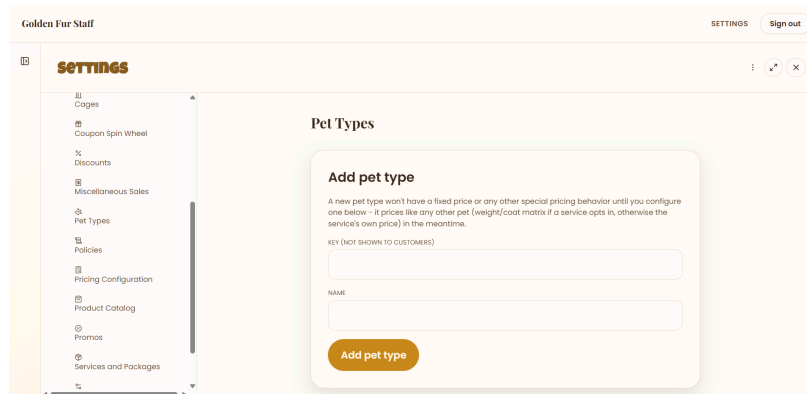

- As a frontend designer, I want admin user > settings > config > policies, to be moved into system configuration
- I want system configured to be renamed into branches
 - Clicking on each branch row item's ... button > configure, will open up the policies page for that specific branch

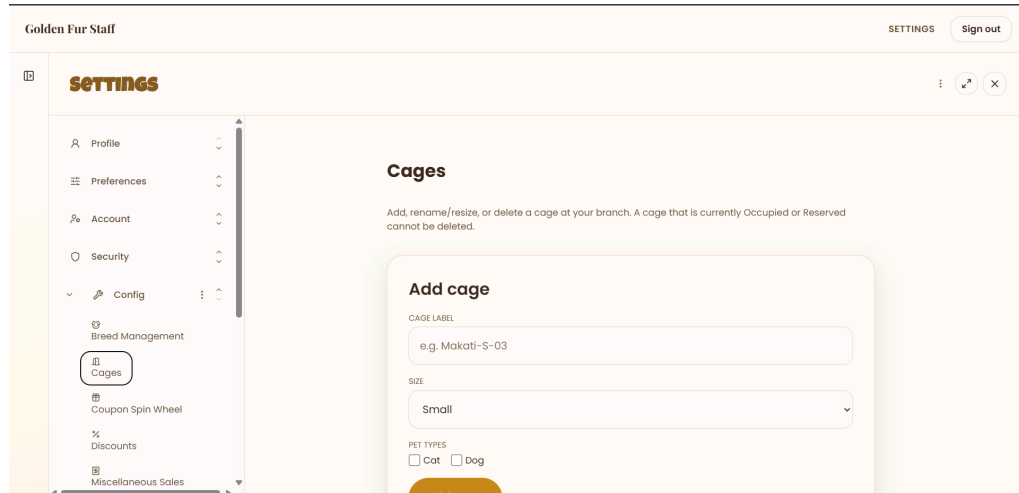

- As a frontend designer, I want admin > settings > config > pet types and breeds to be combined into one page
- Perhaps rename it to just pets
- Place them as subtabs in a mini navbar above the page, just like how the services, service types and packages are arranged
- As a developer, I want a ... button in settings > config > promos and rewards > coupon spin wheel > reward pool > reward item
- The options can be configure and deactivate
- Clicking on configure will open up a modal form that allows me to edit the reward's fields (e.g. title, discount type, value, rarity, etc.)

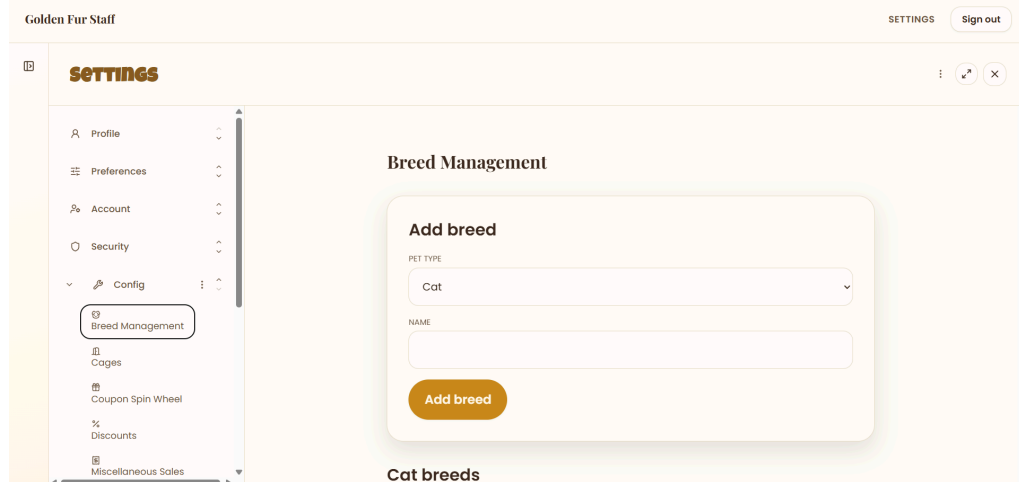

- As an admin/superadmin, I want the Add pet type form to only appear as a modal when button is clicked
 - I want all the label captions to be simplified as well, understandable by laypeople
- As a developer, I want the Key field removed, use Name instead if it's referenced in the codebase

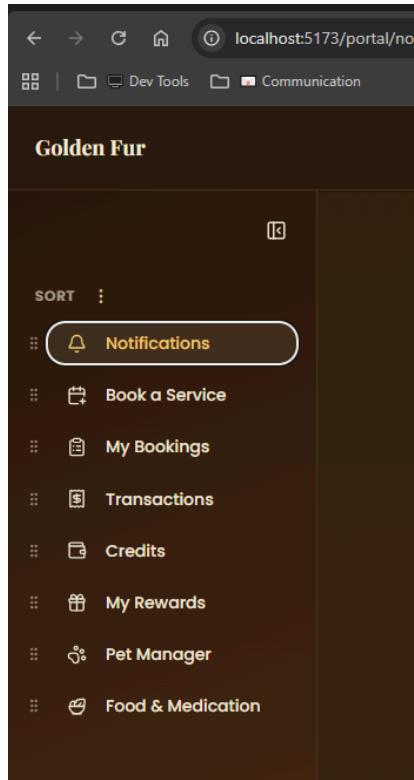

- Add a Configure option in ... button
- It should open up a modal that prompts the user to set the price override and in what branches (apply the same search, views, ... button and other controls to this as well)
- As an admin/superadmin, I want the Add Cage form to only appear as a modal when Add Cage button is clicked

- As an admin/superadmin, I want the Add Breed form to only popup as a modal when Add Breed button is clicked

- As a frontend designer, I want the Notifications page from the sidebar removed, since there's already one in the navbar

- As a frontend designer, I want the Credits tile in the sidebar removed, since there's already one in the navbar

Merged ▾	- Add new promo step in booking process - Receptionist/customer can choose their promos their before payment review step - Promos should be multiselect - Should still respect the promo config (e.g. max %, max promos selected, etc.)	Matthew ▾																																																																

Merged ▾	● Include variations to promos ○ Currently there's only time limit ○ Add some sort of redemption point system ○ E.g. after X subsequent bookings, after X money spent in 1 transaction ● Add new promo type ○ Every X day of the week, get X% off of X services ○ When adding new promo type, open up a promo builder/wizard ○ Steps are: Promo Type (e.g. duration with start/end date, every X day on week, after X subsequent bookings, etc.) > the form fields based on that promo type ● As a customer, I want X sub bookings, X money/credits spent in 1 transaction to reward me a random %/flat PHP off coupon ○ I want it to look like a spin the wheel animation ○ I want each reward to have a % chance ○ I want there to be a pity system, after X coupon spins, guarantee a reward from the lowest % pool ● As an admin, I want to be able to add and configure the coupon spin wheel rewards ○ I also want to be able to assign the % rarity ○ I want to assign the %/flat PHP off amount ○ I want to modify the pity requirement	Matthew ▾
Merged ▾	● Customers should not be able to choose cages during booking process, only receptionist ○ Make it readonly for customers ● As a customer, I want to see what cage is assigned to my pet based on his size and pet type, I don't care how many other cages are there, I only want to know if there's a cage for my pet and perhaps the ID of that cage ○ If there's no available cage, I want it to be indicated immediately	Matthew ▾

Merged ▾	● Specify if cages are for cats or dogs ○ Should also affect which cages are shown on booking process depending if pet is dog or cat ○ As an admin, I want to be able to specify what pet type a specific cage is for ○ As a developer, I want these seeded into the remote database	Matthew ▾
Merged ▾	● Add admin config to pet types ○ CRUD for pet types ○ Make it so that they can set X fixed price to pet types, this will override service and package prices ○ By default, set cat type to 800 php for both services and packages (seed this) ● As an admin/superadmin, I want ALL SERVICES AND PACKAGES for cat type pets to be fixed price at 800	Matthew ▾

- When making another booking, after an online booking was made by another customer, I can no longer choose the date/time slots he chosen (even though downpayment was still not paid)
- As a customer, I want to be able to select the same date time, staff/cage slots as a customer who DID NOT YET pay his downpayment for his online booking
- Should be able to select the same slots (date time, preferred staff, etc.) if downpayment is still not paid (unconfirmed booking status)

The screenshot displays a booking interface with a dark theme. At the top, there are four tabs: '6 Booking Type', '7 Staff & Date' (which is highlighted), '8 Your bookings', and '9 Review'. Below the tabs, there is a 'Date' section with buttons for 'Previous day', a date picker showing '09/11/2026', and 'Next day'. Underneath the date, there is a time selection area. A dropdown menu is open, showing a list of time slots: '08:00 AM' (highlighted), '8:00 AM' (1 slot available), '9:35 AM' (1 slot available), '2:20 PM' (2 slots available), and '3:55 PM' (2 slots available). To the right of the time slots, there is a 'Sort: Default' dropdown. Below the time slots, there are two staff selection buttons: '? No preference' and 'MG Makati Groomer 2' (which is highlighted). At the bottom, there are 'Back' and 'Next' buttons.

-
- If one of the two customers were able to pay their downpayment first, notify the other customer to adjust his booking date time, staff or cage (e.g. tell them that the selected booking time is currently unavailable, please update your booking details)
- As a customer who failed to pay his downpayment before another customer, I want to be notified that my chosen slot for X booking is no longer available, and I want to be prompted immediately when I open into my dashboard to adjust them
 - If there are multiple bookings where I failed to pay my downpayment in time, I want you to list all of them in the popup modal, and record it in my notifications
 - I want the list items to be linked to the actual booking record

Merged ▾	● When updating a pet's weight via an assessment type booking, automatically update its weight class ○ No longer need to manually select the weight class ○ It should derive from actual weight value ○ Perhaps make it readonly, but still can be overridden ○ Should be able to set it to lbs or kg ● Add settings whether to view pet's weight as lbs or kg (per user, not admin control)	Matthew ▾
Merged ▾	● At admin settings > services: ○ Add config to set average time of service ○ This will affect the duration of bookings that have this service ○ Make packages derive from this as well ● When making new booking > date time picker step: ○ Remove end time presets (time blocks) ○ Only show start time ○ At the bottom (not in select; separate label), show end time and duration of booking ● Rearrange booking steps: ■ Branch > Customer > Pet > Service Type > Services/Packages > Online/Walkin > Date Time + Staff/Cage picker > Confirmation	Matthew ▾

Merged ▾

- Simplify cashier account > transaction > mark transaction as paid modal:
 - Currently there's 2 payment fields
 - What is amount to collect for?
 - What is cash tendered for?
 - Simplify and merge, 1 field only and that's the field how much the cashier/customer is going to pay against the transaction
 - You can omit the change label

The screenshot shows a 'Transactions' screen with a modal titled 'Mark as paid - PHP 1275.00'. The modal contains the following fields and labels:

- Amount to collect (PHP)**: A text input field with the value '1275'.
- Payment method**: A section header.
- METHOD**: A dropdown menu with 'Cash' selected.
- CASH TENDERED (PHP)**: A text input field with the value '1275'.
- Change: PHP 0.00**: A label at the bottom of the modal.

At the bottom of the modal are two buttons: 'Cancel' and 'Mark as paid'.

In the background, a table of transactions is visible with columns: Date, Customer, Method, Status, and Amount.

Date	Customer	Method	Status	Amount
9/8/2026	Customer 1	int	Due payment	PHP 1275.00
9/8/2026	Customer 1	Cash	Fully Paid	PHP 1275.00
9/6/2026	Customer 1	int	Due payment	PHP 708.75
9/6/2026	Customer 1	int	Due payment	PHP 708.75
9/4/2026	Customer 1	int	Due payment	PHP 2550.00
9/4/2026	Customer 1	Cash	Fully Paid	PHP 643.75
9/4/2026	Customer 1	int	Due payment	PHP 643.75

Matthew ▾

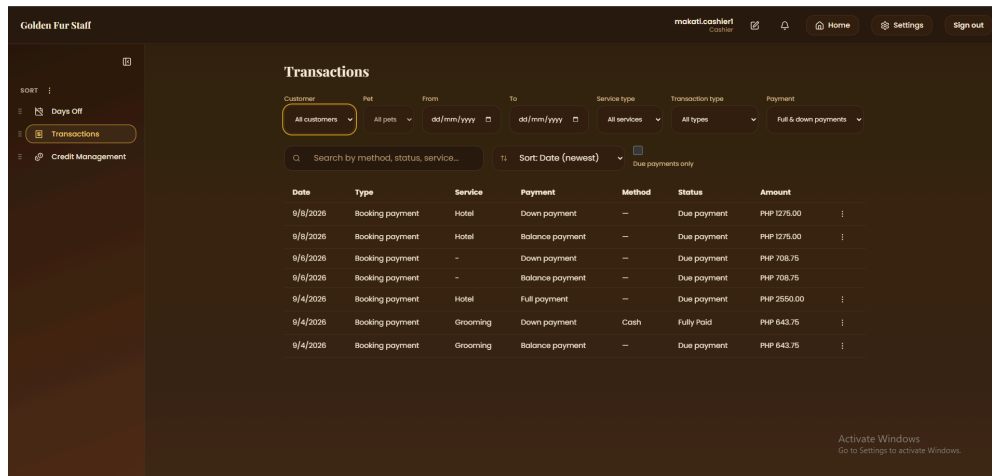

Merged ▾

- Fix confirmed hotel type bookings not being read by groomers
 - Since they're default in progress, groomers are no longer able to check the pet in
 - Thus the instructions do not show up in Boarding Checklist

Matthew ▾

Merged ▾

- Remaster cashier > transactions UI:
 - Currently they cannot see transaction owners
 - Add col that specifies the customer
 - The filters and sort are too complex
 - Reduce it to 1 sort and filter controls, adding sorts/filters creates round tiles like in Notion (you may look it up)
 - Each sort/filter tile instance can be removed via X button on hover

Matthew ▾

Merged ▾

- As any user, I want any record from any table I delete to be stored in an archive, where I can then query (search, filter, sort, etc.) in the future if I ever need to restore it

Alarie ▾

Merged ▾

- Add a way for staff to see their rest days, etc. assigned by supervisors and admins in monthly schedule
- As a staff member, I want to be able to see my schedule for the month
 - I want to be able to navigate to it via the sidebar

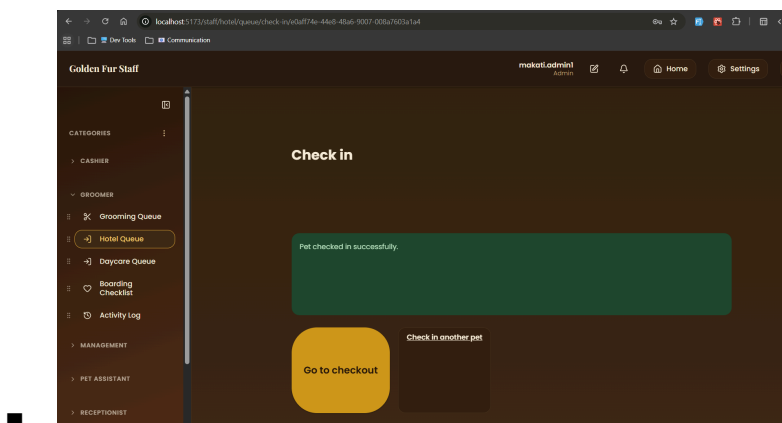

Alarie ▾

Merged ▾	● Fix Booking Queue/customer bookings > new booking > Start Over/Recover Progress feature ○ Currently, it also saves completed bookings (e.g. it saves progress from payment step AFTER clicking on confirm booking) ○ Should only save up to BEFORE clicking confirm booking	Alarie ▾
Merged ▾	● On http://localhost:5173/staff/daycare/queue: ○ Remove checkin checkout subpages ○ Just add a status field to hotel queue items (e.g. pending, checked in, checked out, or follow the standard pending, in progress, completed, cancelled, no show like bookings queue) ○ Remove checkin/checkout buttons on each list item ○ Make it so that clicking on a pending list item opens the ... view details to finalize hotel booking details ○ Clicking on a checked in pet opens a custom http://localhost:5173/staff/hotel/care-log page that only has the tasks filtered only for that pet ○ Clicking on checked out pet does nothing	Alarie ▾

Merged ▾	● On new booking > hotel type service > feeding and med instructions: ○ Make it more specific ○ Add units of measurements ● Perhaps directly to the items, not during instructions ○ Like when adding a new feeding/med item as a customer, allow them to specify its unit of measurement ○ Like those you see in diet apps ○ Perhaps allow them to attach images to it too	Alarie ▾
Merged ▾	● Remove the fully booked indicator when starting a new booking: ○ I believe this runs when all staff are selected in bookings ○ EVEN THOUGH, they're scheduled on different dates ○ This does not mean that on X date, X staff are unavailable ○ Either drop how fully booked works or rewire its functionality	Alarie ▾

Merged ▾

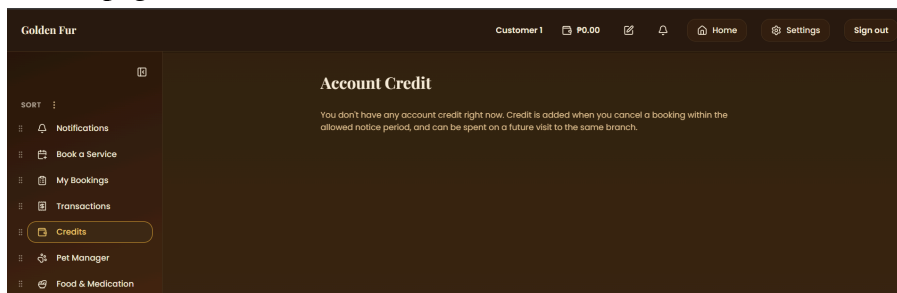

- On <http://localhost:5173/staff/hotel/queue:>
 - Clicking on check in on hotel queue should immediately check in the pet, does not open <http://localhost:5173/staff/hotel/queue/check-in/e0aff74e-44e8-48a6-9007-008a7603a1a4>
 - Move <http://localhost:5173/staff/hotel/queue/check-in/e0aff74e-44e8-48a6-9007-008a7603a1a4> to the ... button > View booking details with an edit option at the bottom
 - Do not open this page with go to checkout and check in another pet options after checking it, just return to the queue and show a modal if success or fail

Alarie ▾

Merged ▾

- Credits page must be visible even if credits sit at 0

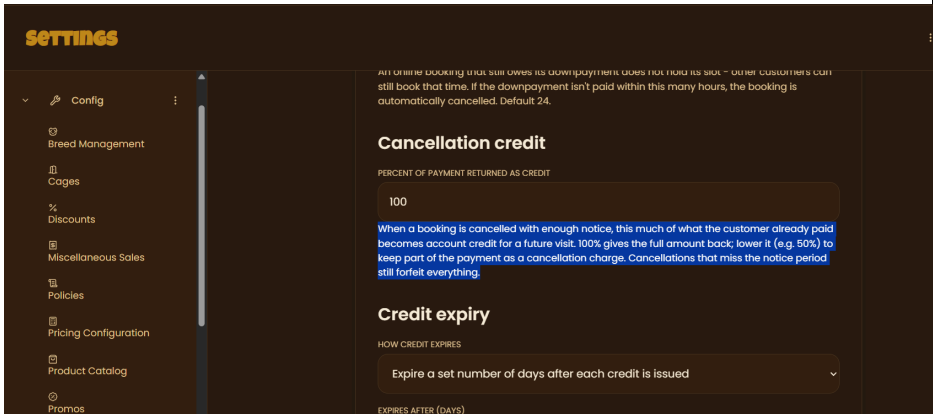

Alarie ▾

Merged ▾

- Shorten/summarize the text to be more concise.

Alarie ▾

Merged ▾

- At Cashier > Transactions page, can mark as paid, recover ... button to mark transactions as paid

○

- At booking > new booking > staff and date step:

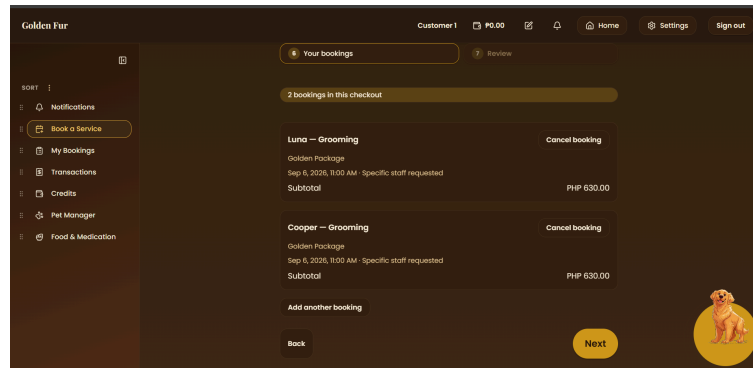

The screenshot shows the 'BOOK A SERVICE' app interface. At the top, there are nine numbered steps: 1 Branch, 2 Customer, 3 Pet, 4 Service Type, 5 Services, 6 Booking Type, 7 Staff & Date (highlighted), 8 Your bookings, and 9 Review. Below the steps, a progress bar indicates '1 booking in this checkout'. The main content area shows 'Walk-in -- starting now' with a time range of '3:49 PM - 5:24 PM today' and 'Ends 5:24 PM - 1h 35m'. Under the 'Staff' section, there is a search bar 'Search staff by name...' and a 'Sort: Default' dropdown. Below these are three buttons: 'No preference' (with a question mark icon), 'Makati Groomer 1' (with an 'MG' icon), and 'Makati Groomer 2' (with an 'MG' icon). The 'No preference' button is highlighted with a yellow border.

-
- Display the services you booked in staff and date.
- As a customer/receptionist, I want to be able to see the services I have selected and the payment breakdown throughout all the steps after services, so that I don't need to go back to the services step just to know
 - I want it to be minimal and extendable so that it doesn't bother the information on the current step
- At services type:
 - Show service duration at step 5 choose service step
 - As a customer, I want to see how long each service lasts, and I want to see a breakdown of the total duration right beside or below the price breakdown

Merged ▾	● At admin settings > policies: ○ Rephrase 24h period to: <i>If no payment is made within 24h, the booking is automatically cancelled</i> ○ As an admin user, I want all the labels in settings to be brief and uses only simple terms, so that I don't need to google any of the words used discount or promo – not per individual service. Walk-in bookings always pay in full. DOWNPAYMENT TYPE Percentage of booking total DOWNPAYMENT (%) 50 RESERVATION HOLD (HOURS) 24 An online booking that still owes its downpayment does not hold its slot – other customers can still book that time. If the downpayment isn't paid within this many hours, the booking is automatically cancelled. Default 24. Cancellation credit PERCENT OF PAYMENT RETURNED AS CREDIT	Alarie ▾
Merged ▾	● In receptionist role > bookings queue, remove branch step ○ Since staff accounts are tied to a branch, receptionists should only be able to make bookings at their current branch ● Only do this for receptionist and admins (since admins are also branch locked) ○ Customers and superadmins should still be able to select what branch	Alarie ▾
Merged ▾	● Add option for staff to extend nights for booked pets in hotel type services ○ E.g. extend stay by 2 nights ○ Should affect final price ○ Affects remaining balance transaction instances (or creates new if fully paid)	Alarie ▾

Merged ▾	● Allow vets access to bookings queue ○ But they can only book customers they have treated ○ This will replace the integrated follow-up booking feature	Alarie ▾
Merged ▾	● Makes changes to credit conversion from cancellation after downpayment ○ Make it so that staff can review whether to return downpayment as credits or not ○ Need manual review of reason of cancellation ○ This is to see if reason is valid ○ Perhaps just add a setting toggle that allows credits on cancel to be either manual or automatic, set per branch	Alarie ▾
Merged ▾	● Audit repo to change Resend to Brevo ○ Optimize all email API features, perhaps there's some bugs that drain the 300 email daily limit for Brevo ○ Make sure to capture all email features and change it to Brevo	Matthew ▾

- Currently, the new bundled booking feature allows selection of the same staff (from staff picker) on the same date/time
 - Determine if staff assignment is 1 = 1 (e.g. 1 groomer = 1 pet only) or 1 = many (e.g. 1 groomer = 2 pets)
 - Sample booking chose groomer 1 for both Luna and Cooper on same date 11 AM

- Perhaps add a config in admin settings that will allow admins to set how many times a staff can be chosen by a booking customer at the same time on the same date

- Fix booking > new booking > hotel type service > step 8 care instructions:
 - When unchecking same instructions every night, and instructions in other nights are not configured, booking fails
 - Should set the first night instructions the default for other nights (so no need to set)

-
- Changing instructions for a specific night will only overwrite the instructions for that night
- Or perhaps add a new tab that says default instructions, which will be applied to all nights
- Then apply overwrite on nights that are edited

Merged ▾

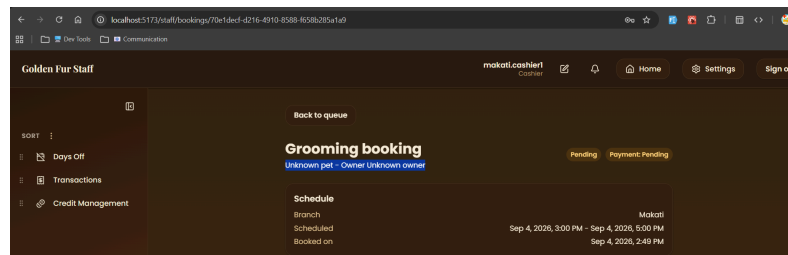

- Add new option to ... in customer account > bookings page:
 - Add View Details option
 - Should be able to see all details (e.g. branch, pet, date time, assigned staff/cage, price, payments, etc.)

Matthew ▾

Merged ▾

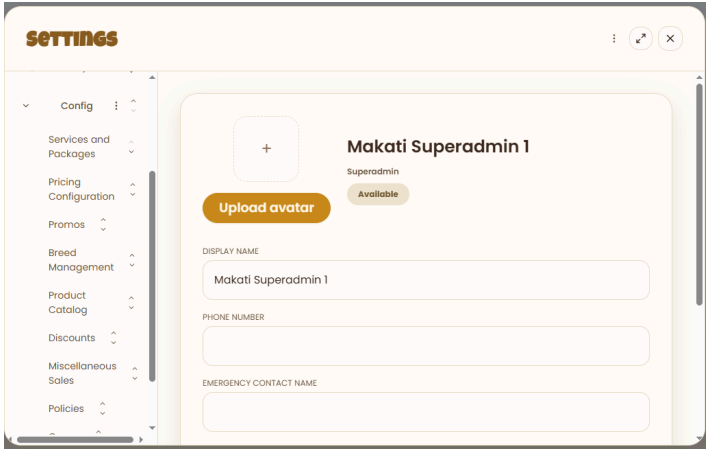

- Fix unknown pet owner and unknown pet when viewing bookings as cashier

Matthew ▾

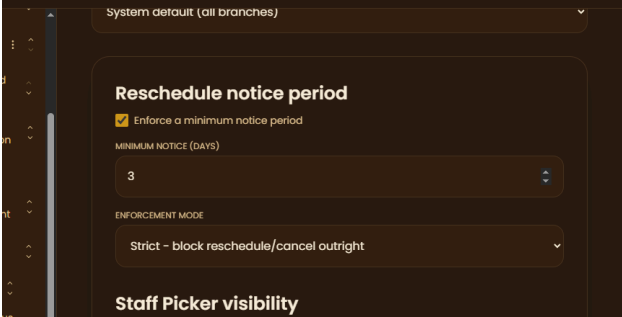

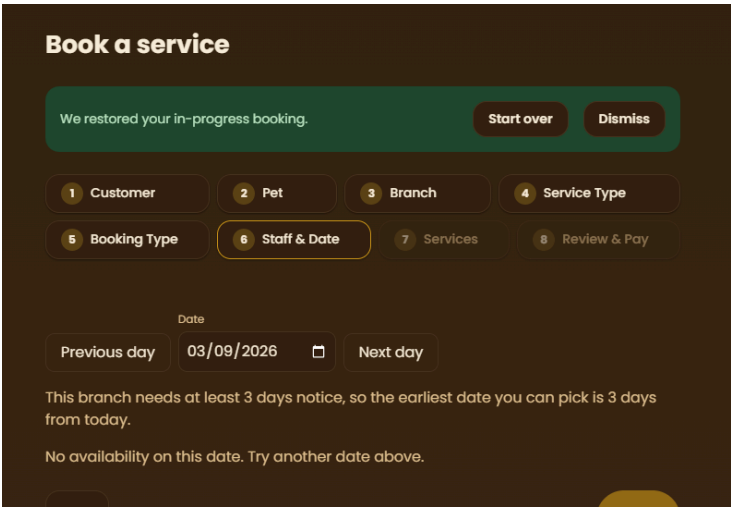

PROD 1

Feature	Contributor
- When making new booking > service type step: - Allow selection of multiple service types - This opens up multiple subbookings (each with their own services/packages, date/time, staff/cage) - But they will all share the same price - Update the booking process status bar thing (step 1, step 2, step 3...) to include a booking status (¼ bookings; depending on how many service types are selected) - Introduce some sort of order of priority of subbookings - The first subbooking gets to config the start date/time, the other subbookings will just follow its end time (e.g. start date time sep 10 - 8 AM, ends at 10 AM, next booking start time will be readonly 10 AM... next booking star time readonly...), UNLESS it reaches branch operating hours cutoff time (last service ends at 5 PM) - Perhaps make it so that the next service gets scheduled for the next day (with additional night stay fees) OR make it so that this follow end time feature is optional - When checked off, allow manual setting of start date time instead of following the previous service end time - Perhaps make this end time tail feature show a list of all the end times of all filed bookings, then allow selection of ONE only of those list items, which will set the start time of the current service - Filter out the end times if appending the current service will cause cut off overtime - Though still allow staff/cage selector, no need to make them readonly - Perhaps we can also introduce sub subbookings: - Allow selection of multiple pets - Selecting a second pet creates a sub subbooking, and this pet can have its own sub bookings when selecting multiple service types - OR TO MAKE THINGS EASIER, just add a step before payment confirmation - Show list of bookings, make another booking and cancel booking buttons below - No need for that append latest booking to previous end time feature - This uses a much simpler model, and still allows multiple bookings to share payment, downpayment, promos or discounts	Matthew ▾

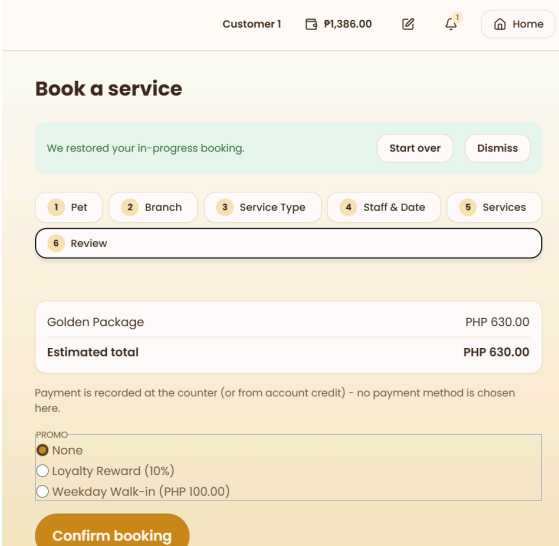

Feature	Contributor
• Currently assessment is merged into bookings queue • Add a new page for receptionist called something like Assessment Queue ◦ Move the assessment functions there (e.g. start > opens new modal > allows receptionist to edit pet's weight and coat values) • Also rename the seed for Misc service type to > Assessment	Matthew ▾
• Add icons to admin settings > config navigation tiles 	Matthew ▾
• Make settings modal fullscreen ◦ Settings sidebar should be a second sidebar ◦ Auto collapses the dashboard sidebar when settings opened	Matthew ▾

Feature	Contributor
- When creating new service type > staff picker, it doesn't specify what staff roles are available to choose from - Extend it by adding options to choose staff roles (multi-select) - Since grooming services > groomer, vet services > vets, etc. - Do the same for existing service types and update seed scripts - Also remove the key field, this should be randomly generated anyway, only leave out name - Just drop key field, it seems redundant, I don't like it showing in the list either	Matthew ▾
- Add something like requests/ or sessions/ somewhere in vault repo > Projects - It should be filled with folders of claude or other AI sessions, where each session has a file for: - The plan for the request, explained to a college student (not even entry level) - The testing steps for the docs, clear and followable, literal step by step as if I don't know how to navigate - Context files themselves or reference to them (if they're placed in different directories) - Create necessary skills, agents or hooks to replicate this	Matthew ▾

Feature	Contributor
● Fix how date and time picker in bookings queue > new booking: ○ Currently, when it's 1 PM today and I set a booking for tomorrow, it only shows booking time slots 2 PM and beyond (AS IF IT'S TREATING TODAY'S AVAILABLE BOOKING SLOTS FOR TOMORROW AND LATER DATES) ○ Later dates should reset and show all available booking time slots based on branch operating hours and break times ● Staff should not appear in staff picker when they're not available ○ Confirm if availability time is computed properly (does it take into account the monthly schedule that the supervisor set? Is staff on vacation leave? etc.) ○ Right now, monthly schedule is not configured by admin role, so all staff should be available EXCEPT when they're chosen by a customer at X date/time (only on that date/time should they not be selectable) ● Hotel queue check-in flow ○ Clicking "Check in" on the hotel queue should check in the pet immediately — no redirect to the check-in page. ○ Move the check-in page's content into the "... " menu > View booking details, with an edit option at the bottom. ○ After check-in, return to the queue and show a success/fail modal — remove the "go to checkout" / "check in another pet" screen. ● Credits page ○ Credits page should stay visible/accessible even when a customer's balance is 0.	Alarie ▾

Feature	Contributor
● Fix not being able to book the next day or today in booking queue ○ I think the 3 day notice period FOR RESCHEDULING ONLY, is ALSO applying to future online bookings ○ You may add a separate config (for the online booking notice period) in admin settings > config > policies ○ See the 2nd image below ○  ○ 	Alarie ▾

Feature	Contributor
● Add info button on booking process > service type step ○ Should include the available services for that service type (but readonly)	James ▾
● Add an explicit confirmation dialog ('Are you sure you want to cancel this booking?') before a cancellation is executed. ● Add on-screen copy in the cancellation flow disclosing that payment (full or down) is non-refundable but will be converted into account credit for use on a future visit.	Alarie ▾
● Fix the bug preventing a newly created and activated service type from appearing in the service selection list.	Alarie ▾
● Investigate and fix the 3-day-minimum (or N-day) booking filter/configuration — verify it correctly applies date ranges instead of appearing to lock/pin schedules.	Alarie ▾

Feature	Contributor
- On new booking: - Allow customers/receptionist to choose payment scheme at last step - Either downpayment or full payment - Currently it auto locks full payment  - Verify that choosing downpayment scheme should initially create 2 transactions (downpayment + remaining balance) - If remaining balance isn't fully paid, it creates another remaining balance transaction instance - Verify that downpayment config per service/package is now gone - It should've been moved to admin settings > config a while ago	Matthew ▾
- At booking process > payment step, allow customers/receptionist to choose payment scheme, whether to pay in full or downpayment when doing online bookings - This decides the number of transactions made at customer > my transaction or cashier > transactions - Full payment = 1 transaction only - Downpayment = 2 transactions (e.g. downpayment and remaining balance, or perhaps make it flexible? 2+ transactions? Downpayment + multiple remaining balance transaction instances where you can choose how much to pay, creates new instance if remaining balance is not paid in full) - Remove payment mode in booking process, move it to customer > my transactions and cashier > transactions - Payment mode only appears when clicking on a transaction > pay - Customers can choose credits, gcash or paymaya - Cashiers can choose cash, bank, card, pickaroo and the aforementioned three	Matthew ▾

Feature	Contributor
● Allow customers to see when will their credits expire (perhaps on hover or a dedicated credits page) ● Also allow them to see on what branch their credits are tied to (since credits are branch limited) ○ Perhaps just show the sum of all their credits across branches in the navbar ○ Then clicking on it will open a dedicated page that shows the credit distribution across other branches and their expiry (date and days left) ● Improve credits expiry config in admin settings ○ 2 options: entire branch credits expire at X date, or credits from specific transaction from specific booking expire at X date ○ Only one or the other	Matthew ▾
● Add a configurable cancellation-to-credit conversion rate (default 100%, admin-adjustable, e.g. down to 50%) instead of a hardcoded full conversion. ● Fix the bug where credits were not generated after a cancellation during testing — verify the down-payment-to-credit pipeline end-to-end. ● Re-verify that the reschedule flow correctly reflects updated booking status and resulting credit balance after a cancellation. ● On the navbar, show how much credits a customer has (only applies to customers), include an icon	Matthew ▾
● Update golden fur seed scripts ○ Make sure all necessary tables have rows ● Also add a supabase seed script updater agent/skill that auto runs whenever changed code touches a table with a seed script ● Add a skill/agent that auto runs push migrations to supabase when changes to supabase/migrations are made (only run after entire task is done) ● Since you said that the skill/agent that runs verify all vscode task on commit/PR request doesn't fix the failing CI results, create a subagent and/or skills that fixes failing CI checks from verify all vscode task ● Also create an agent and/or skills that auto updates the existing workflows in the vault repo if anything changes to the corresponding code that involves it are made, and another agent/skills that updates the debugger agent/skills (like .agent\agents\booking-capacity-agent.md)	Matthew ▾

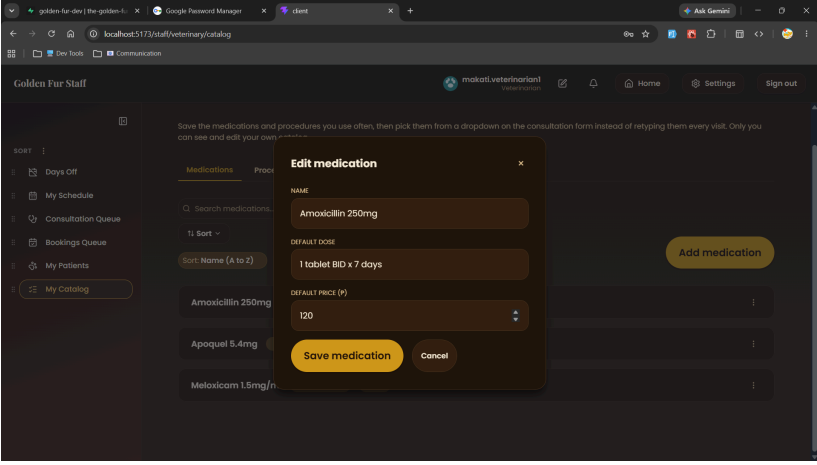

Feature	Contributor
• Add a subagent code reviewer in golden-fur repo for unbiased code reviews ◦ Only give it readonly perms ◦ Should auto run before creating commits, publishing branch or opening PR ◦ Decide where it should place its outputs, I'm thinking somewhere in Projects\golden-fur\testing	Matthew ▾
• Add a dedicated transactions page (I think it's already there) to search, filter and sort all customer transactions (e.g. downpayment, full, etc.), where each transaction is linked to a booking • Online bookings of status pending payment will appear here for cashiers to mark as paid • Make other queues pull bookings from payments queue (fully paid or partially paid), instead of relying on bookings queue (status IS NOT pending) • Or perhaps just add an extra status in bookings queue before pending (e.g. unconfirmed), that specifies that an online booking is still not paid • Perhaps revamp entire bookings queue status to something like: unconfirmed > confirmed > no show > cancelled • While all the other queues will use the standard status: pending > in progress > completed	Matthew ▾
• Require some form of online payment (full or down payment) on every online booking — do not allow a slot to be reserved with zero payment. • Make the down payment configurable as either a percentage of the total price or a flat fixed amount, set by an admin/owner. • While a down payment is unpaid, keep the booking at 'Pending' and leave that time slot visible and bookable by other customers — it should not lock the queue/schedule. • Add an expiration timer to unpaid down-payment reservations (e.g., due by end of day); auto-release the held slot if the deadline passes unpaid. • At the payment phase of the booking process, add an option for the customer/receptionist to choose either full payment or downpayment for online transaction (NOT IN WALK INS, walkins auto full) • At payments queue, a design the UI in a way that allows cashiers to mark transactions as paid ◦ If the transaction is downpayment not full, marking it as paid shows partially paid instead of fully paid ◦ Each list item should have a way to view the payment details (e.g. date, amount) for each transaction within the booking) • Discounts and promos apply before downpayment is calculated	Matthew ▾

Feature	Contributor
- Confirm that the downpayment config at admin settings only applies to online bookings and not walk ins - Online bookings are identified as bookings made not on the same date and time (any other booking that's not a walk in)	Matthew ▾
- Build a dedicated walk-in booking flow: same-day, on-site registration for walk-in customers, distinct from the future-appointment booking flow. - Build this in the booking process (for both receptionist and customer) > date time picker - They should be able to choose if it's an online booking or walk-ins - If they're a walk-in, put them in automatically in the booking queue - You might need to improve the booking queue status (to differentiate between unfinal online bookings and walk in bookings, or perhaps just make online bookings to pending, and walkin bookings to in progress) - Only walk-in bookings should show up at the other queues (e.g. grooming, vet, hotel, daycare)	Matthew ▾
Move the down payment toggle/config so it applies per transaction (all online bookings/services), not per individual service.	Matthew ▾
- Document the all the workflows in the vault repo - Group by modules - See sample mermaid code output	Matthew ▾

Ideas

James task: customer home page widgets

High Priority

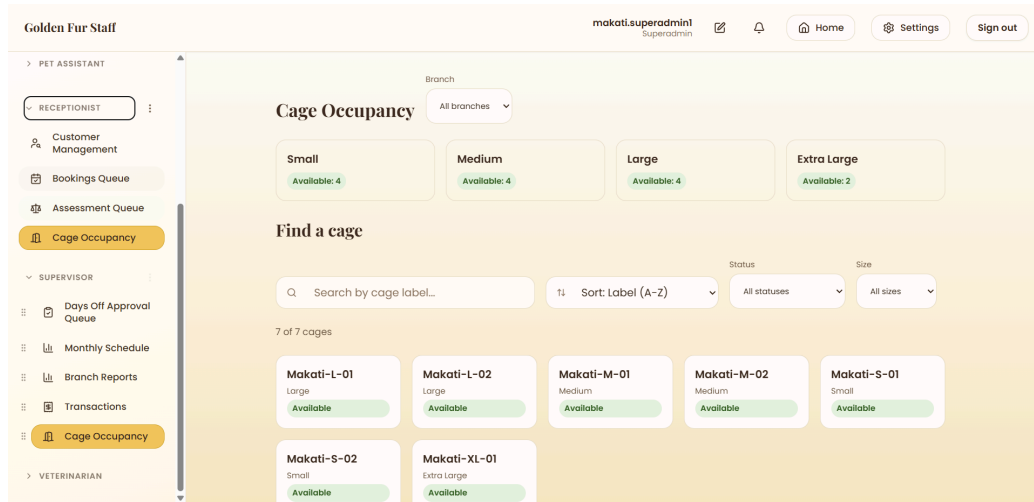

Task	Difficulty
As a vet staff, I want some sort of dedicated prescription builder, where I can choose the medicines/procedures in my catalogue, their frequency and other conditions to my patients 	Unknown ▾
- As an admin, I want to be able to check or uncheck conditions that will make the coupon spin wheel pop-up - Perhaps something like: after every X bookings, daily login, consecutive logins per week, consecutive logins per month - I also want to be able to create multiple reward pools, and assign trigger conditions to them (ex: monthly login triggers a reward pool that consists of only rare rewards)	Unknown ▾
As an admin, I want to be able to freely add a coupon spin wheel reward and configure its rarity without having to manually adjust everything to make it total to 100%	Unknown ▾
As a frontend designer, in admin > settings > config, I want designated sections for each page, and each section can be collapsed or extended	Medium ▾

Task

Difficulty

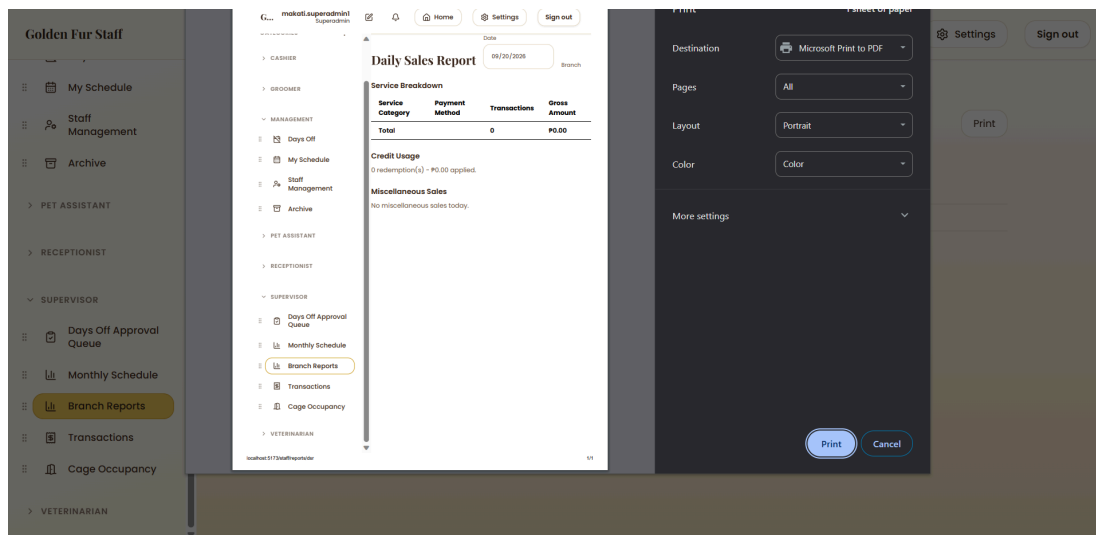

- As a frontend designer, when selecting shared pages as an admin/superadmin, I want the page that I clicked specifically to be the only one highlighted, not including the other same pages from other roles

Cakewalk ▾

- As a supervisor/admin/superadmin, I don't want the navbar and sidebar to be included when printing the navbar > supervisor > branch reports document

Medium ▾

Task	Difficulty
- As a frontend designer, I want admin/supervisor > navbar > days off approval queue to be renamed to something like day off requests - Implement the shared search, sort, filter, group by and view options	Cakewalk ▾
- As a frontend designer, I want admin > navbar > management items to be combined with supervisor - Supervisor should have access to staff management and archive from management section	Easy ▾
- As a developer, I want navbar > management > days off and my schedule to be not visible or writable by supervisors, admins and superadmins - Reserved only for lower privilege staff	Easy ▾

- As a superadmin, I want to be able to easily read the pet weight ranges in settings > config > weight classes section
- Perhaps add a cool custom range UI, where each weight class is plotted in it, along with their ranges

The screenshot shows a web application interface for 'Golden Fur Staff'. At the top, there's a header with the name 'Golden Fur Staff' on the left and 'SETTINGS' and a 'Sign out' button on the right. Below the header is a sidebar menu with various settings categories: Discounts, Miscellaneous Sales, Pet Types, Policies, Pricing Configuration, Product Catalog, Promos, Services and Packages, System Configuration, and Weight Classes. The 'Weight Classes' section is currently selected and expanded. The main content area displays a configuration form for weight classes. It has three input fields: 'S STARTS AT (KG)' with the value '9.5', 'M STARTS AT (KG)' with the value '22', and 'XL STARTS AT (KG)' with the value '41'. Below these fields is a 'Save weight classes' button. Underneath the form, there's a section titled 'Resulting bands' which lists the resulting weight ranges: 'S — under 9.5 kg', 'M — 9.5 kg up to (but not including) 22 kg', 'L — 22 kg up to (but not including) 41 kg', and 'XL — 41 kg and over'.

Task	Difficulty
- As a developer, I want an option to either choose whether to receive TOTP in an authenticator app or via email in Settings page > Security section - I also want to be able to unbind or disable existing MFA methods - As a frontend designer, I want a section that contains TOTP setup - It should include a button that opens a popup modal, prompting me to choose between email or authenticator app - Choosing email will ask me to confirm using current password - I want the steps to be displayed after choosing - I want a toast to show whether it's a success or fail	Hard ▾

Task	Difficulty
As a user, I want to see sample rows when choosing between kg or lbs in Settings > Pet Weight 	Cakewalk ▾

Task	Difficulty
- As a frontend designer, I want all of these validation indicators (e.g. Profile saved) to be turned into popup toasts across the entire codebase - I want them to match the current color theme (light or dark) - I want them to be removable on click - As a tester, I want a step by step list document created in the vault repo in order to test the new toasts  The screenshot shows the 'Golden Fur' application's settings page. On the left is a sidebar with a hamburger menu icon and four settings categories: Profile, Preferences, Account, and Security. The 'Profile' category is selected. The main content area displays several form fields: 'FULL NAME' with the value 'Customer 1', 'CONTACT NUMBER' with '+63 917 000 0001', 'EMERGENCY CONTACT NAME' with '3423423', 'EMERGENCY CONTACT NUMBER' with '4234234234', and 'PREFERRED COMMUNICATION' with 'Call'. At the bottom of the form, a green toast notification reads 'Profile saved.' and a yellow 'Save Profile' button is visible.	Hard ▾

Task	Difficulty
- As a frontend designer, I want the Add new type from in My Food and Medication Types customer page to be at the top - I want it to come in a form of a button - Clicking on the button opens a popup modal with the form details  The screenshot shows a web application interface for managing medication types. At the top, there's a header with 'Customer 1' and a balance of '₹0.00'. Below this is a list of six medication types, each in a light blue rounded rectangle. Each item has a name on the left and 'Rename' and 'Remove' links on the right. The items are: Amoxicillin 250mg, Antihistamine (Diphenhydramine), Ear Drops, Flea & Tick Treatment, Probiotic Supplement, and Rimadyl 75mg. Below the list is a section titled 'Add a new type' in a light blue rounded rectangle. It contains a text input field with placeholder text 'e.g. Chicken kibble, Amoxicillin', a dropdown menu currently showing 'Food', and a red 'Add' button.	Cakewalk ▾

Task	Difficulty																		
As a general user, I want the dog mascot to be buried under popup modals, so that I can see the frontmost content  A screenshot of a dark-themed pricing modal. At the top, it says "Golden Package" with a price of "₱693.00". Below this is a "Pricing" section with a table: "Subtotal" (₱693.00), "Total" (₱693.00), and "Down payment" (₱346.50). At the bottom, there is a "Payments" section. A circular yellow icon with a golden retriever mascot is positioned in the bottom right corner of the modal, partially overlapping the "Down payment" row and the "Payments" section. <table><tr><td colspan="2">Golden Package</td><td>₱693.00</td></tr><tr><td colspan="3">Pricing</td></tr><tr><td>Subtotal</td><td></td><td>₱693.00</td></tr><tr><td>Total</td><td></td><td>₱693.00</td></tr><tr><td>Down payment</td><td></td><td>₱346.50</td></tr><tr><td colspan="2">Payments</td><td></td></tr></table>	Golden Package		₱693.00	Pricing			Subtotal		₱693.00	Total		₱693.00	Down payment		₱346.50	Payments			Cakewalk ▾

- Add on screen tutorials for customer and each staff role - Should dim entire screen except for next step UI - Next, Previous and Skip buttons - Can be activated again by interacting with a floating dog mascot (from landing page) - As a new user, I want a full tutorial on how to use the website, so that I don't have to try things in order to understand them - I want to be able to run the tutorial again as an option in my Settings page - I want the tutorials to be categorized into different section, each can be started independently	Hard ▾																		

Task	Difficulty
● In customer > sidebar: ○ Combine New Booking and My Bookings into one page or nav tile ○ Just name it Bookings ○ At Bookings, add a New Booking button that opens up the booking process	Cakewalk ▾
● In booking process > new booking: ○ Add list format to when searching for customers ○ Improve search button query (e.g. when typing S, it should show all customers with S in their username, display name, etc.)	Unknown ▾
● Add color and label indicators to cage selector in booking process ○ Show “booked pet will out in X days/hours/minutes” ○ Green is about to out, orange if longer time to out, red if long stay until out ○ Add search, filter and sort functions to cage selector ○ Add table, list and board view options (kanban) 3:00 PM – 3:00 PM today Cage ? No preference MA Makati-S-01 (S) MA Makati-S-02 (S) MA Makati-M-01 (M) Recommended MA Makati-M-02 (M) Recommended MA Makati-L-01 (L) MA Makati-L-02 (L) MA Makati-XL-01 (XL) Back Next ○ ○ Or perhaps just add it to the Cages page (not in booking process)	Medium ▾

Task	Difficulty
● As a customer, I want a dedicated page (e.g. Inventory page) containing the rewards I received from spin the wheel feature ○ I want to be able to see the details of when I obtained it, its use case conditions, its rarity, etc. ○ I want to have a search, filter, sort and group by features in case I accumulated a lot of promos ○ Add table, list and board view options (kanban) ○ I want them to be default grouped by their type (e.g. the time limit, promo on X day, spin the wheel reward, etc.)	Medium ▾

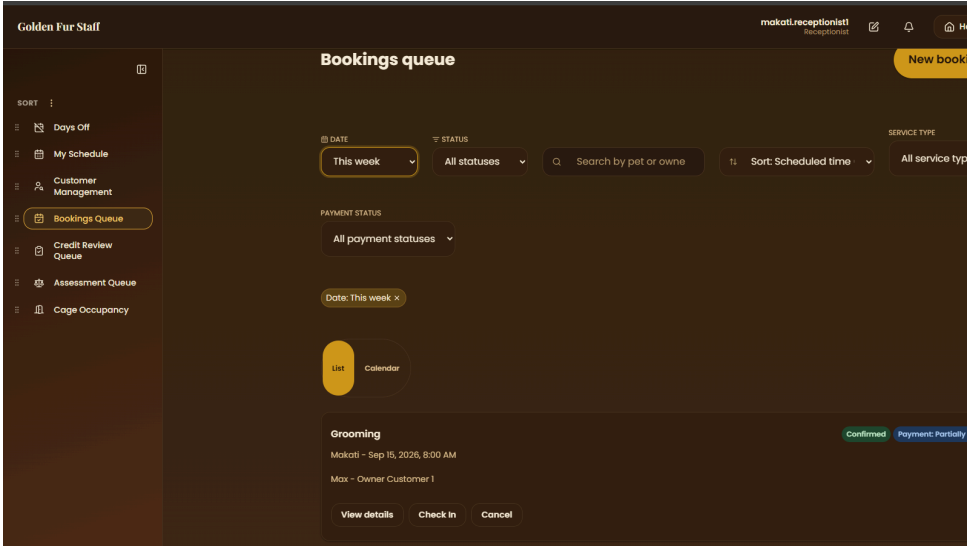

Task

Difficulty

Easy ▾

- As a developer, I want the X slot/s available in the Date Time Picker to be removed, it seems a bit redundant as there's already a Staff Picker
 - Only show the start time as an option if there's at least 1 available slot

The screenshot shows a pet grooming booking application interface. At the top, there are nine numbered steps: 1 Customer, 2 Pet, 3 Service Type, 4 Services, 5 Booking Type, 6 Staff & Date (highlighted), 7 Your bookings, 8 Promos & Coupons, and 9 Review. Below the steps, a summary bar indicates '1 service selected · PHP 800.00'. The 'Date' section shows 'Previous day', '15/09/2026' (with a calendar icon), and 'Next day'. The 'Time' section features a time picker showing '09:35 am' (highlighted) and a list of available slots: 8:00 AM (1 slot available), 9:35 AM (2 slots available, highlighted), 2:20 PM (2 slots available), and 3:55 PM (2 slots available). A 'Sort: Default' dropdown is next to the list. At the bottom, there are three staff selection options: '? No preference', 'MG Makati Groomer 1' (highlighted), and 'MG Makati Groomer 2'. 'Back' and 'Next' buttons are at the very bottom.

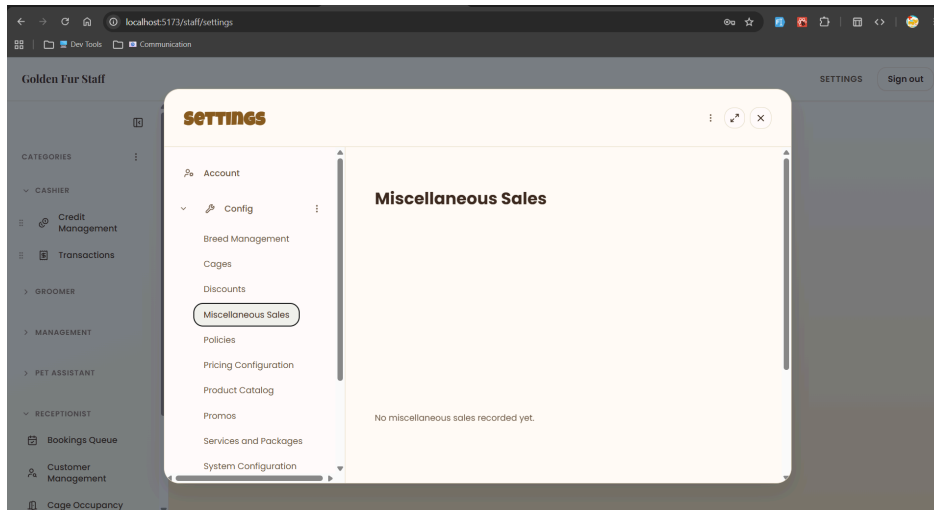

Task	Difficulty
- As a receptionist, I want all confirmed bookings (e.g. online bookings where downpayment is paid) to have a check in button in the bookings queue, so that they're not immediately marked as in progress in the other queues (assuming the pet has not arrived in the location yet, booking is only confirmed) - So far only grooming service type has been tested, make sure this is the same for hotel, daycare, assessment, and vet service types as well 	Medium ▾
- As a developer, I want the staff MFA TOTP codes to not be refreshed randomly, so that users don't lose access to their account - Somehow, TOTP codes in google authenticator randomly resets, and still prompts for a TOTP code - There's no longer a QR code to scan, making it impossible to access - I want you to determine what is causing this random reset and fix it	Unknown ▾

Task

Difficulty

Unknown ▾

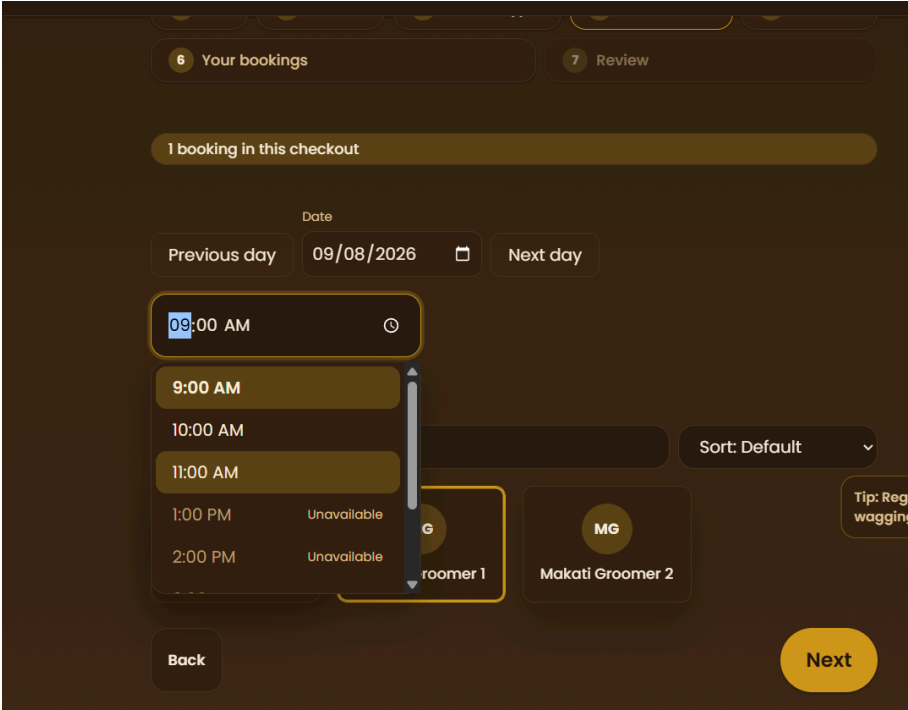

- Remove all traces of misc sales (e.g. in admin settings, transaction types)
 - Simply indicate that it is out of the system's scope

- Or perhaps move it to cashier, records are added to Transactions page
- As a cashier, I want to be able to update a customer's total credits on X branch
 - I want read and write access to a global misc sale items
- As a customer, I want to receive a confirmation notification if a cashier is trying to update my credits, I want to be able to decline if they attempt to abuse this
- As an admin, I want full CRUD on this global misc sale items

Low Priority

Task	Difficulty
● As a user, I want group by options to be implemented in other view options, not just in board or gallery ○ When used in table or list view, it should list down the group by options vertically, not horizontally, just like in Notion ○ These vertical group by options have a dropdown button, that can collapse and extend the group by column rows ● As a developer, I want this to be applied to all pages/components that use this shared view component	Easy ▾
● As a developer, I want each code file to have its corresponding test file if it's necessary ○ If there are any unnecessary test files, you may remove them ○ As a developer, I want your decisions to be based off of industry standard practices	Cakewalk ▾

Task	Difficulty
● Determine what is causing hotel type services to start at 1 PM, even though other services can start as early as 8 AM  ○ ● Image context: ○ It is a bundled booking ○ Initial booking at hotel type scheduled for 1 PM (couldn't choose anything earlier) ○ This is the 2nd booking, can choose 9 AM	Unknown ▾
● Add stats to each staff ○ Staff can view how much bookings they've made, sales made, etc. based on staff role ○ Can be seen in profile page	Medium ▾
● Improve admin dashboard sales breakdown ○ Allow admins to see which days or days of the week where stats are low (low sales, low customers, low bookings, etc.)	Medium ▾

Task	Difficulty
● Reduce vet type services to 2 only: ○ Consultation and vaccine ○ Reason is that there's not much vet in PH ○ It would be nice if vet can set their own specialization and their own services	Easy ▾
● When staff edits existing booking (e.g. receptionist changes price, adds new instructions) ○ Add a notif/email via Brevo to customer that includes the waiver with required e-signature before staff edits are accepted ○ Once signed, include a confirm button at the end of message	Medium ▾
● At booking process > new booking: ○ Add a waiver process (e.g. warnings, disclaimers, disclosures, etc.) ○ Should include all waiver details ○ At the very end, include an e-signature field ○ Once booking is confirmed, send booking details and waiver to customer as email ○ Also notif/email the booking details and signed waiver to the assigned staff, and the receptionist who made the booking (if staff made) ● When adding new service type: ○ Add "is waiver required" option ○ When checked, open up a section that allows admin to specify waiver sections, text content (perhaps add formatting options like from google docs) ○ Should stop booking confirmation if waiver is not signed, or auto opens the waiver modal	Hard ▾
● Staff (receptionist) should be able to edit final price of all service types ○ Especially for dematting services, it's more of a hassle to complete and consumes more resources	Unknown ▾ A

Task	Difficulty
● Vet type staff should have some sort of specialization (e.g. respiratory, cardio, etc.) ○ This should be shown in booking process > staff picker ○ This should also influence what kind of services they offer ○ These services should be readonly if initial consultation service has not been used by the customer ○ So for vet type staff, I assume the booking process would be: branch > pet > service type > staff and time pickers > services/packages... or should it be different? ○ Services prices are TBD, only estimated prices on payment stage, should be editable by the assigned vet after or during pet treatment	Hard ▾
● Try ollama integration in the system	Hard ▾
● Fix search bar icons on search input fields overlapping with input text ○ One in customer login/signup ○ Admin settings > promos config page ○ Admin settings > services and packages page	Easy ▾
